iNSPIRE HACK

Myanmar's First And Foremost in-person Hackathon For High Schoolers And University Students

Introduction

Students in Myanmar haven't been in school for two years. Until today, there aren't any students in public universities and schools. During the COVID-19 crisis, schools weren't able to move online. Why? - Lack of technologies. Moreover, the public school students of Myanmar have never done science labs and most of them have never been in school computer lab.

Since we are in the age of technology, a lot of students in Myanmar are too interested in pursuing careers in tech. But they have no ideas where to start.

We believe that there are a lot of diamonds in the rough in our country. We would like to cheer them and help them to be motivated by allowing them to meet like-minded people. Moreover, we named this hackathon Hack Inspire because we want to provide avenues to expose students to programming and computer science.

iNSPIRE HACK

- First Hackathon in 2 years
- 150+ attendees
- Beginner Friendly

Solution

On December 23rd, 2022, our non-profit organization Tee Htwin will be running Inspire Hack. Tee Htwin is a 501(c)3 nonprofit organization fiscally sponsored by Hack Club Bank that is serving STEAM education by providing STEAM classes. Over 125 attendees will participate in this hackathon. It will be the first hackathon held in 2 years and will be the first in-person hackathon that allows high schoolers to participate.

We welcome students of all backgrounds to attend and encourage the registration of women, LGBTQ+, and underrepresented students.

Students will transform their imagination into reality. They will find their ways to get into the world of technology in this hackathon. They will create games, websites, and robots in a day-and-a-half-long hackathon. Judges will choose the best projects for prizes. Attendees will have unforgettable memories after the hackathon.

Where you can come in?

Your sponsorship is important for us in the success of Inspire Hack. By sponsoring us we can provide the best hackathon experience to our attendees. You can support this hackathon by donating money, sending mentors for virtual workshops, and providing tools for attendees.

Donating Money

This allows us to pay for expenses and is the easiest way to support us. Money that you donate to us will be converted to the Myanmar Currency and will be used for hackathon expenses. Sponsorship tiers are shown in the following page.

Sending Mentors For Virtual Workshop

This allows you to directly interact with our attendees, giving you the ability to leave a strong, lasting impression on the incoming talent and the next generation. Moreover, it helps students to keep motivated.

Providing Tools

The attendees will use design, deployment, hosting, testing, and version control tools to create their projects. By providing tools to attendees, they will use your products and could be potential customers.

Sponsorship Tiers

	Silver $500	Platinum $1000	Gold $2500	Diamond $3000
Opening Speech Video	1 minute	3 minute	5 minutes	10 minutes
Logo on website and T-shirt	✓	✓	✓	✓
